

Cur!ous Toys

Statement of Testing and Product Safety

All Curious Toys products, including the entire Bonz line of construction toys - ExoBonz, BugBonz, GloBonz, DragonBonz, SkyBonz, SeaBonz, BugBonz, BonzBand and DogBonz are tested by an independent testing agency and are in full compliance with current US government standards.

The vast majority of parts are cast from ABS plastic with the pigment cast into the part resulting in no ingestion risk. Less than 1% of the pieces (BugBonz ladybug, SeaBonz clawz) have an overspray of paint and all of the paint is tested on a regular basis to ensure that it contains no lead. As of 2009, all parts and packaging are phthalate free.

The complete testing report on each product is available on request by emailing info@curioustoys.com.
